### Emergency Operations Center

Director: [Staff Sergeant Jim Macormic](#)

The Emergency Operations Center is the nerve center for City Government and other governmental and emergency response agencies in the event of a widespread emergency in Rolla or the surrounding area. Located in the basement of the Rolla Police Department, with emergency power and communications systems, the EOC is capable of being activated on short notice upon the decision of the [Mayor](#) or [City Administrator](#).

The EOC is staffed by RPD officers and civilian personnel, and by members of each of the City's

Departments as well as representatives from up to a dozen or more other entities. The EOC provides coordinated communication, between agencies providing emergency service, agencies responsible for basic infrastructure, and the news media. The EOC is also in constant communication with Central Communications and Dispatch when it is in operation, providing continual, up-to-date knowledge of situations being reported by citizens to the 911 system and its member agencies.

For more information on the EOC and its operations, contact [Staff Sargeant Jim Macormic](#) at 308-1213.

### Emergency Facts and Tips

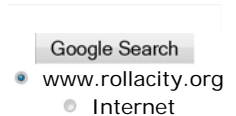

Everyone should have a basic knowledge of severe weather and hazardous accidents safety rules. Knowing what to do, or where to go when threatened can be the difference between life and death. This is equally important whether you are at home, work or in school. Having a rehearsed emergency plan in place can greatly reduce the potential of injury or even loss of life.

The following valuable safety information concerning severe weather and hazardous materials accidents is provided by both the National Weather Service and the State Emergency Management Agency. We encourage you to read this information thoroughly.

***A little preparation now could save lives later!***

***Plan... React... Survive!***
